

PHONE APP FEED ORDERING

POWERED BY EAI CONNECT

The feed ordering module integrates with our NexGen® Office software. Designed with mobile devices in mind, the feed ordering module offers online order entry and viewing capabilities to customers, consultants, and employees. These users can use the phone app at work, at home, or on the road. The feed ordering module automatically syncs order data with NexGen Office and provides the ability to view any orders the user has access to (whether submitted via the app or not).

- + Order with a user-friendly, step-by-step process on the EAI Connect app.
- + Order parameters include customer, location, formula, quantity and delivery date.
- + See real-time status on orders the user has access to.
- + Users can order for one or multiple locations.
- + Available in English and Spanish.

EAI Connect is our new cloud-based offering that will allow customers enhanced data-sharing capability and the ability to transfer information to and from their system online. Online feed ordering is the first module of EAI Connect, with additional modules currently in development.

INTERESTED IN PHONE APP FEED ORDERING?

Schedule a short demonstration to see if feed ordering is a right fit for your facility and operation. Schedule by emailing info@easy-automation.com or calling 507-728-8214.
